

# **ProMount Series**

Quick Guides

**iSHOX<sup>®</sup>S**  
**PROFESSIONAL**

## Our promise

Our mounts are adapted to the environment in which they are used. Moisture, dirt, cold or heat, the Dakar rally or a Himalayan expedition, an iSHOXs® Shark of a surfer on the North Sea or the iSHOXs® M1 GT on the wing of a Corvus racer 540 at the Red Bull Air Race - all of our mounts have one thing in common: perfect fit.

The supplied accessories (tools, accessories, spare parts, etc.) may not be misused and may only be used in connection with the product! Illustrations and images may show color variants, optional accessories and products from other manufacturers. All trademark rights are the property of their legal rights holder and are used here only for the description or the identification of the devices. Subject to technical changes.

**CAUTION:** Our products have a high clamping force, which means that damage to the clamping points can occur if the clamping setting is too high. Please use extreme caution when applying the clamping device.

**CAUTION:** Keep the products out of the reach of children, as improper use may result in death or serious injury. iSHOXs products are not toys. Small parts such as screws, small spare parts, etc. and plastic packaging can also be swallowed and lead to suffocation. Some of the products are supplied with tools that may be pointed or sharp. These must be handled with appropriate caution and assembly skills, otherwise injuries may also occur. Our products should only be installed by a person who has basic manual skills! In case of doubt, the product can be returned.

**CAUTION: The products must never be attached to the body!**

**ATTENTION:** All iSHOXs mounts are delivered with a security cord to secure cameras. Cameras mounted on iSHOXs mounts shall always be tied to the handlebar or rail or otherwise to the product to prevent loss of or damage to the camera in the event of an accident. We are not responsible for any loss or damage to cameras or other third-party products.

**CAUTION:** Check bar or rail for predetermined breaking points before installing the iSHOXs mount. The mount must not be fixed to bars or rails with predetermined breaking points.

**CAUTION:** Check the secure hold of the suction cup before use by pulling the centerpiece towards you. If the suction cup is loose or comes off, reattach by following mounting instructions and recheck the secure hold before use.

# The new innovativ 2C ProFork

## Best of both worlds

The new, innovative 2C ProForks are the ultimate in professional mounting parts for the GoPro™ compatible camera mounting system from iSHOXS®. The sturdy central strut made of high-quality aluminium provides extreme stability. The two outer struts made of glass-fiber-reinforced ABS plastic provide an unprecedented degree of flexibility. The high-strength tightening torques of the locking screws give the user complete control of the correctable camera angles. The 2C ProFork is supplied together with most Pro Series mounting systems. iSHOXS® is continually developing new, innovative ideas for cameras and smartphone mounts. Just like nearly all of our newly developed products, 2C ProFork systems are also compatible with all previous systems.

Our customers report time and again that the iSHOXS® service and product updates are unique in the sector.

## 2C ProFork Add-Ons

iSHOX<sup>®</sup>S is more than just the promise of a good idea. That's why iSHOX<sup>®</sup>S customers can now order the new 2C ProFork system that matches their mount. There is a lot more to discover, too. The combination of aluminium and fiberglass-reinforced ABS plastic now makes it possible to replace the base of the variable 2C ProFork if necessary, e.g. after a crash. You can also swivel the new Vario Lock ProFork by 90° if required. Spare screws and a screwdriver are of course included. An ultra-lightweight 2C Xtension with a total length of 3.93" completes the package.
